

PRESENTATION OF THE COMPANY

WWW.ESKOS.COM

About us

Esko solutions is a team of experienced experts in design, marketing, photo\ video shooting and business packaging, who came together to create a strong company capable of carrying out the most ambitious tasks for equally ambitious clients.

Our staff consists of more than 20 experts in their niche and over 30 attracted individuals to perform all services.

Average experience of our employees, from 5 to 13 years, mainly as private, actively developing specialists.

We are ready to provide services all over the world

as with personal
participation, and remotely
to guarantee maximum comfort
of collaboration and efficiency
of implementation
of all works.

Our main objective

to become your only and most reliable
partner in matters of packaging and
development of all your companies,
performing all tasks in one place,
without wasting time searching
for different performers for different
tasks of your business.

How we stand out from other companies

01

All in one place

creating a logo, complete branding, developing a marketing strategy, creating photo/video materials, complex graphics, a company website, further advertising - all this is done without the need to look for different artists.

02

Full transparency of the process

We divide payments for the project into many stages, provide full reports on each of them, and always show the process of organizing and working on the project in a personal chat.

Your personal manager is always ready to answer any questions and listen to your wishes.

Taking care of your comfort

We don't bother you with every little detail, we get the task and return with the result.

Say no more to long paper reports, we show all the work in the format of convenient video presentations.

04

Exclusive results down to the last detail

We do not use cheap photographs,
people from stock photos,
or compromise graphics in our work.

All parts are purchased or created
specifically for your project and
then transferred to your ownership.

How you save money while getting better results.

Maximum efficiency of all investments

All graphics, advertising elements, and company branding are built in such a way that they can be used many times for different tasks, repeatedly reducing budgets during long-term work.

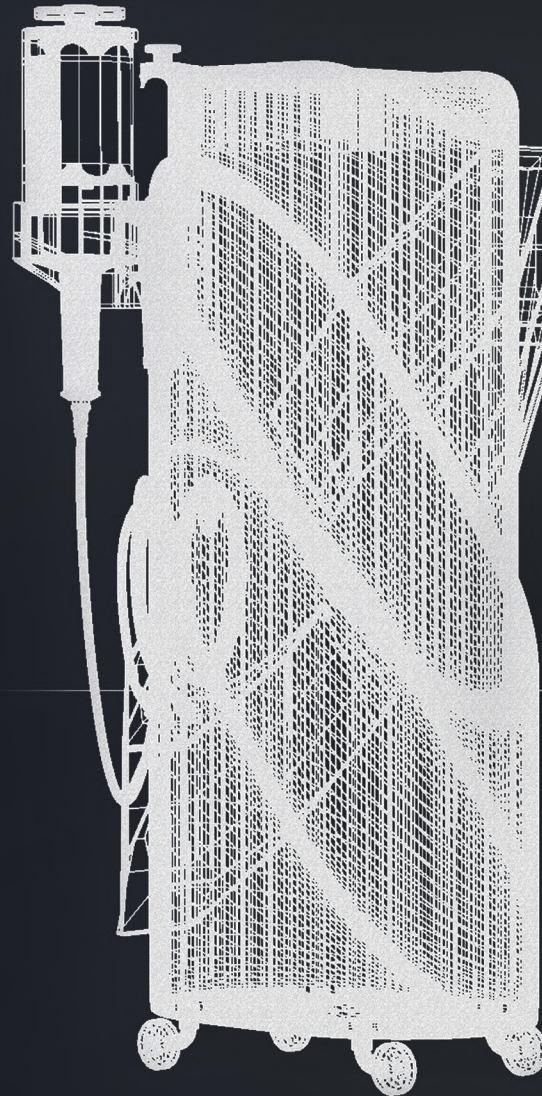

Advanced technologies provide better results and cost savings

We use 3D graphics
and machine learning.

Instead of constantly investing in photo/video shooting, we create three-dimensional models of your products or services once, so that you can make changes at any time and obtain new materials with minimal expense.

3-dimensional mesh

Final 3D render

Created to help you earn more

We work together with your sales team and managers to help you sell more effectively.

We make adjustments and changes to the packaging based on their feedback when working with clients.

Main distinctive feature

We specialize in large and complex projects

where it is necessary to complete a large list of tasks, from creating a company logo and brand book, to websites, social networks, photo\video materials.

This allows us to offer the best conditions, maximum results and really help you stand out among your competitors by creating a profitable business image and marketing strategy.

Services in our arsenal

**Our work consists
of many stages that
complement each other**

the list of tasks is selected individually
for each company in order to maximize
the potential of our services in each specific case.
